THE EXCEPTIONAL FLIER OF MAURITIUS

Photographer: Bruno Wägli

Location: South Coast of Mauritius

Subject: Fruitbat

Equipment used: Nikon Z8, Nikkor Z 180-600
/ 5.6-6.3 VR @ 600mm

Camera Settings: ISO 800, 1/500sec, f6.3

Why I love this image: The flying skills of diurnal fruit bats are amazing. They are able to fly precisely, even through dense treetops, to reach their favorite fruits. When flying, depending on the position of their wings, these amazing creatures really do look like the Batman logo.
